

Year 3 Forest School Session 3 3.10.19

Today we started by thinking about Roman temples. Some children tried to make their own versions using sticks, while others found some guttering and tried to make an aqueduct. Other children enjoyed the muddy bank, after the rain it was a challenge to see how far they could get up the bank. Some other children constructed a den and began to camouflage it collecting leaves and sticking them down with mud.
