

## Year 3 Forest School Session 3 12.3.2020

This week has been Science week in school. Today we thought more about animal habitats. We decided we could make some more birdfeeders and bee houses to support and encourage wildlife in our site. A group of children went and weeded the vegetable patch by the greenhouse ready for planting. Other children made dens and cars. While a few other children used tools to make a bee house.
