

Nursery Forest School

Session 5 - Week beginning 21st September

Today we thought about being fire fighters in Forest School. We worked together to make a fire engine using the logs and tyres. Some children explored using the hose to role play with, while others tried to pour water in the hose like a real fire fighter. This was really tricky for some. We tried different containers and utensils and explored whether we needed to stretch the hose or leave it in a coil. The children also explored the rain and tried to catch it on their tongues.
