

Topic: Take a Walk on the Wild Side

Key questions:

Who lives in the sea? Could we live under water too? Who lives in the rainforest? Why do tigers have stripes? Would a Dinosaur make a good pet?

Vocabulary

Focus areas

Key texts

Tide

The rise and fall of the sea surface in response to forces exerted from the moon.

Current

A continuous, directed movement of sea water generated by forces.

Shrub Layer, Under Canopy, Canopy, Emergent.

The differing layers of the rainforest.

Indigenous tribes

Hunter-gatherer communities living native to a particular place.

Extinct

The species has died out and no longer exists.

Fossils

Preserved remains.
